

## Text Interpretation - HTML (advanced)

With Text Interpretation - HTML (advanced) it is possible to include HTML objects such as tables in reports. This report contains 3 formulas. The formula "Table" contains a table with 2 columns and fields with different colors in each row. The formulas "NumberedList" and "BulletList" contain numbered and bullet lists, respectively.

| Different Colors in HTML table |         |
|--------------------------------|---------|
| aqua                           | black   |
| blue                           | fuchsia |
| gray                           | green   |
| lime                           | maroon  |
| navy                           | olive   |
| purple                         | red     |
| silver                         | teal    |
| white                          | yellow  |

### i-net Clear Reports components:

- Java Reporting Engine
- i-net Designer
- Servlet
- Standalone Listener (Server Application)
- PHPProxy
- RDC (Runtime Design Component)
- Windows Service
- Cache
- Remote Interface
- Ad Hoc Reporting
- Scheduler (i-net Crystal-Clear Plus only)

### Numbered List:

1. This is the first entry
2. This is the second
3. The third
4. ... and so on
